BED MANAGEMENT In Healthcare Industry

Bed Management includes the ability to have real-time operational awareness of the status of all the beds at a facility and to be able to plan for efficient use of these beds.

Bed Management includes Tracking

Bed Management Issues

- 1 Elaborate Spreadsheets are required to be maintained
- 2 These spreadsheets need to be updated multiple times daily
- 3 Daily management becomes very complicated in case of large facilities

Why do we need an Integrated Bed Management System?

Increased Productivity & Efficiency

Improved patient transfer and care coordination data

Reduced Delays & Resource Wastage

Shorter bed turnover time and waiting time for patients

Better bed assignment and right patient care

Better predictive planning

elixir™-The one-stop solution for all Bed Management needs

- 1 Entire facility capacity details on a single screen
- 2 Heatmap for real-time availability details
- 3 Daily admit and discharge details

- 1 Appropriate bed allocation on the basis of care level
- 2 Facility maintenance status monitoring
- 3 Automatic real-time alerts to housekeeping teams
